

Zohaib Khan

UI UX DESIGNER & FULL STACK DEVELOPER

I graduated with Bachelor's of Engineering degree in CS in 2017. But I learnt quite a handful of things which always help me in life to make better decisions. Like, never giving up, learn from mistakes, learn from others' mistakes, learn from resources at hand, et al. I started working as a Front End Designer & Developer since April 2019 in my current company. This is my first job as a dev and since then I have developed myself enormously.

I started working with React and I just love it now. I learned Back End for the first time but I grasped it immediately. And now I can make apps too. All of this within one year. All by myself.

MY SKILLS

Programming languages, libraries, frameworks and tools I am skilled at or I have worked with.

HTML & CSS

SASS

Javascript

PHP, AJAX, jQuery

Python

React Native

Node JS

React JS

Version Control

Zsh, Bash

Adobe XD

Photoshop

English Hindi

Urdu

TIMELINE

2019-NOW

FRONT END DEVELOPER

My first ever programming job. I didn't know anything about coding although I had a CS degree. I started learning design and coding on my own and within just one year, I have made full stack projects in MERN, Python, React Native, Php.

2017-19

CUSTOMER SUPPORT & SALES EXECUTIVE

After graduating, I couldn't get an IT job so I worked as a event manager, sales executive, customer support, etc. I learnt so many things from these jobs that they will continue to help me in making wise choices throughout my life.

2011-17

BACHELOR'S DEGREE

I studied at Acharya Institute of Technologies, Bangalore. I graduated with a degree of Bachelor's of Engineering in Computer Science in 2017. I learned everything in college except engineering.

RECENT PROJECTS

EXPENSE MANAGER APP

I had already built this project in React with Hooks & Context API as Front End, NodeJS as Back End and MongoDB as database. I recreated this app in React Native & it was an amazing experience.

IMAGE WATERMARKING

I was fascinated by the idea of how services like Shutterstock could automate the process of watermarking. So I tried it on my own. I know its not the best but it gets the job done efficiently.

HOBBIES

Cinema
